

# National Education Funding

## Leadership & Professional Development Grant *For Private School Staff*

Did you know that there are government-funded grants specifically for private schools to uplevel their employees?

This is high-quality training delivered by our team of master educators with **no out-of-pocket costs**.

Our team will help customize & deliver relevant training that improves the retention, tailored to meet the needs of your staff.

1 Check eligibility<sup>1</sup>

2 Submit your application.

3 Once approved, confirm your date and participants.

“

Our team has come a long way this year and what you provided has improved our teaching.

Michael Simpson, Head of Lower Schools  
Greenhill Schools

”

<sup>1</sup> Funding is to help cover the costs of training needed to retain, improve and increase the competitiveness of W2 employees and employers. Eligible schools must be a for-profit entity with less than 100 W2 employees.

## ▶ **Advanced Teaching Practicum: Affective Learning & Design** **(6hrs Blended\*)**

NEW!

Effective classroom management and student engagement begins with the affective domain--students' emotions, motivations, and behaviors.

In *Affective Learning and Design*, you'll first explore how moods, feelings, and emotions play a crucial role in student engagement and success. Then, together, we'll create emotionally resonant lessons that not only boost academic achievement but also foster a supportive, inclusive learning environment.

By mastering affective strategies, you'll be equipped to better understand your students' emotional needs, design lessons that inspire, and provide targeted support for those who need it most. Transform your teaching practice--and your students' lives--by embracing the affective side of learning.

\* Blended courses include online modules, graded assignments, discussions, live instruction

## ▶ **Advanced Differentiation Through Depth & Complexity** **(6hrs Live Instruction\*)**

How do you continue adding complexity that keeps curious minds exploring? In this workshop, we will discuss advanced differentiation, increased rigor, and individual, standards-based products.

We will share practical strategies for differentiating academic content while reinforcing the affective component (by exploring what teachers can say and do to best acknowledge, support, and nurture students' social/emotional needs).

\* Live Instruction can be in-person or virtual (Zoom). Choose one 6-hour or two 3-hour sessions.
